Mohamed Amine Zalila

Junior Software Engineer

Aspiring Junior Software Engineer eager to leverage academic knowledge and practical experience to contribute to innovative software development projects. Decent foundation in programming, web development, and mobile development, seeking to grow and develop in a dynamic and collaborative environment.

WORK EXPERIENCE

Back-end Development Internship   February 2024 – Mai 2024
Dasseti, Dubai (Remote)

- aimed to automate the retrieval and processing of SEC Form ADV files from the SEC website into Dasseti platform, these files contain essential information about fund managers' operations. It involved phases like data analysis, mapping, and backend development using ASP.NET Core and C#. The ultimate goal is to provide users with digitized, easily searchable data, automatic updates, and efficient reporting capabilities, enhancing their ability to make informed investment decisions.

Web Development Internship   January 2022 – February 2022
Dev-IT, Sousse (Remote)

- Developed a dynamic web application with admin dashboard for a client company.

Web Development Internship   January 2021 – February 2021
Dev-IT, Sousse (On-site)

- Successfully recreated a website using WordPress with a better Front-End Design.
